LAB-13

Create a HTML form that accept the student data like enrollment number, name, email id, password, confirm password, phone number, address, gender, choices of branch and perform client-side validation using JavaScript.

TAGS AND ATTRIBUTES USED:

TAGS USED	ATTRIBUTES USED	DESCRIPTION
`<!DOCTYPE html>`	—	Defines the document as HTML5.
`<html>`	`lang="en"`	Defines the HTML document and specifies English language.
`<head>`	—	Contains information about the webpage.
`<meta>`	`charset="UTF-8"`	Defines character encoding.
`<meta>`	`name="viewport", content="width=device-width, initial-scale=1.0"`	Makes the webpage responsive on different devices.
`<title>`	—	Defines the title of the webpage.
`<body>`	—	Contains the visible content of the webpage.
`<h1>`	—	Displays the main heading "STUDENT REG FORM".
`<form>`	`id, onsubmit`	Creates the student registration form and calls JavaScript validation when submitted.
`<input>`	`type="text", id, required, pattern, title`	Accepts enrollment number and name.
`<input>`	`type="email", id, required, pattern, title`	Accepts and validates the email address.

`<input>`	`type="password"`, `id`, `required`, `minlength`, `pattern`, `title`	Accepts password and applies password validation.
`<input>`	`type="tel"`, `id`, `required`, `pattern`, `maxlength`, `title`	Accepts and validates a 10-digit phone number.
`<textarea>`	`id`, `rows`, `cols`, `required`, `minlength`, `maxlength`	Accepts the student's address.
`<input>`	`type="radio"`, `name`, `value`, `required`	Allows the user to select gender.
`<select>`	`id`, `required`	Creates a dropdown list for selecting branch.
`<option>`	`value`	Provides different branch choices.
`<input>`	`type="submit"`, `value`	Creates the Submit button.
`<script>`	—	Contains JavaScript code for client-side validation.
`function`	`validateMyform()`	Defines the JavaScript validation function.
`document.getElementById()`	`id`	Gets an HTML element using its ID.
`document.querySelector()`	CSS selector	Gets the selected gender radio button.
`alert()`	—	Displays validation messages to the user.
`return false`	—	Stops form submission when validation fails.
`return true`	—	Allows form submission when validation is successful.
TAGS USED	**ATTRIBUTES USED**	**DESCRIPTION**
`<!DOCTYPE html>`	—	Defines the document as HTML5.
`<html>`	`lang="en"`	Defines the HTML document and specifies English language.
`<head>`	—	Contains information about the webpage.

Code

```
<!DOCTYPE html>
<html lang="en">

<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
